OF HOUSE.**

Commercial Kitchen &
Hospitality Facilities Planning

PLAN BETTER. OPERATE SMARTER. BUILD WITH PRECISION.

THE INFRASTRUCTURE BEHIND HOSPITALITY.

HFPC — Hospitality Facilities Planning Consultancy — provides specialist planning and consultancy services for hospitality and food-service back-of-house environments.

We approach every project from the operational side of hospitality, translating requirements into practical spaces, efficient workflows and coordinated technical solutions.

Our focus is simple: create BOH environments that work efficiently behind the scenes and support the operation in front of the guest.

FUNCTION

Every space must serve a clear operational purpose.

FLOW

People, food, equipment, materials and waste must move efficiently.

COORDINATION

BOH planning must integrate with architecture, MEP and project requirements.

VALUE

Good planning reduces operational inefficiencies, unnecessary capex and avoidable project costs.

ONE BOH STRATEGY. MULTIPLE OPERATIONAL SYSTEMS.

Comprehensive planning across all back-of-house functions for a more efficient, functional and successful hospitality operation.

COMMERCIAL KITCHEN PLANNING

Complete planning from concept to operation of commercial kitchen facilities.

FOOD & BEVERAGE FACILITIES

Operational and spatial planning for restaurants, cafés, bars, banquets and food-service facilities.

BACK-OF-HOUSE PLANNING

Integrated planning of supporting hospitality functions and service areas.

LAUNDRY PLANNING

Planning of hotel and institutional laundry operations, equipment and space requirements.

WASTE MANAGEMENT

Segregation, storage, movement and disposal planning for hospitality waste streams.

MEP & TECHNICAL COORDINATION

Coordination of BOH requirements with architectural, structural and MEP disciplines.

PROCUREMENT & DOCUMENTATION

Equipment schedules, specifications, BOQs and technical documentation.

SITE & IMPLEMENTATION SUPPORT

Coordination and review during project execution.

FROM OPERATIONAL BRIEF TO WORKING KITCHEN.

Commercial kitchen planning is based on operational requirements, menu, capacity, workflow, equipment, hygiene, safety, utilities, maintenance and future adaptability.

A well-planned kitchen is not simply a collection of equipment. It is an operational system where people, food, equipment, utilities and information move efficiently.

01**BRIEF****02****MENU & OPERATION****03****CAPACITY****04****SPACE PLANNING****05****WORKFLOW****06****EQUIPMENT****07****TECHNICAL COORDINATION****08****DOCUMENTATION**

- RECEIVING

KITCHEN ZONING (TYPICAL)

DESIGNING THE SYSTEM BEHIND THE OPERATION.

An integrated approach to people, food, materials and waste ensures efficient, hygienic and practical hospitality operations.

FOOD FLOW

Receiving > Storage > Preparation >
Production > Service > Return

PEOPLE FLOW

Staff Entry > Changing > Work Areas >
Service > Support Areas

MATERIAL FLOW

Receiving > Stores > Production >
Service > Return / Disposal

WASTE FLOW

Segregation > Temporary Holding >
Movement > Collection

INTEGRATED FLOWS. EFFICIENT OPERATIONS.

CLEAN FLOWS. CONTROLLED FLOWS.

LAUNDRY PLANNING

Efficient laundry planning ensures smooth linen flow, operational efficiency and long-term reliability.

Soiled

Finishing

Clean
Storage

Distribution

- Equipment planning
- Workflow separation
- Linen movement
- Trolley movement
- Storage
- Utilities
- Ventilation
- Drainage
- Heat management
- Operational efficiency

WASTE MANAGEMENT

Practical and hygienic waste management planning for cleaner and more efficient operations.

Segregate

Hold

Move

Collect

- Waste segregation
- Waste holding
- Movement routes
- Collection points
- Hygiene
- Operational practicality
- Reduction of unnecessary waste movement

FROM BRIEF TO SITE-READY DOCUMENTATION.

A structured and collaborative process to ensure well-planned, coordinated and buildable BOH facilities.

DOCUMENTATION****09****SITE COORDINATION****10****HANDOVER**

KEY DELIVERABLES

- Concept layouts
- Detailed BOH plans
- Equipment layouts
- Equipment schedules
- BOQs
- Technical specifications
- Sections & elevations
- Utility requirement schedules
- MEP coordination inputs
- Procurement documentation
- Site coordination support

BUILT FOR COMPLEX HOSPITALITY OPERATIONS.

Tailored BOH planning solutions for a wide range of hospitality and food-service environments.

HOTELS & RESORTS

RESTAURANTS & CAFÉS

BARS & BANQUETS

CORPORATE CAFETERIAS

HOSPITALS & INSTITUTIONS

CENTRAL PRODUCTION KITCHENS

CLUBS / CREW KITCHENS

QSRs & MICRO-KITCHEN FACILITIES

BASE KITCHENS

INSTITUTIONAL FOOD-FACILITIES

PRECISION WHERE THE PROJECT CAN'T AFFORD ASSUMPTIONS.

OPERATIONAL THINKING

Planning begins with how the facility will actually operate.

SPACE EFFICIENCY

Every curver metre should contribute to the operation.

WORKFLOW OPTIMISATION

Reduce unnecessary movement and operational friction.

TECHNICAL COORDINATION

BOH requirements that work with the wider project.

PROCUREMENT CLARITY

Clear equipment schedules, BOQs and specification support better decisions.

FUTURE READINESS

Planning should allow for practical adaptation and operational growth.

**'GOOD DESIGN IS NOT ONLY WHAT FITS ON THE PLAN.
IT IS WHAT WORKS AFTER THE PROJECT OPENS.'**

LET'S BUILD BETTER KITCHENS.

Whether you are planning a new project, upgrading an existing facility or simply exploring possibilities — we are here to help.
